

IDEAL LEARNING IN COLORADO

Map of Public Early Learning Programs

This map shows Ideal Learning models of EL Education, Montessori, and Tools of the Mind used in public kindergarten or pre-K classrooms in Colorado. As presented below, rural and under-resourced communities have little or no access to public Ideal Learning programs. Private programs (not shown here) are also clustered near Denver and other population centers. For Ideal Learning to be equitably accessible to all families, broader use in public and publicly-funded classrooms is needed. The ability to participate in child-centered learning should not be limited by geographic location, race, ethnicity, primary language, immigration status, or socioeconomic status.

- At least one program present in county
- Montessori
- Tools of the Mind
- EL Education

* Data to map public Reggio Emilia and HighScope programs are not currently available.
