There is now "a viable and continuing early childhood behavioral health provider. A system of sustainable billing for a technical assistance helped create research, commitment, and integration.

Many more kids have been screened and more are being referred back and forth. Medical providers were interested in behavioral health training another behavioral health provider because more and medical providers for a meeting. She wanted us to feel welcome and embracing and engagement. That is "Your behavioral health consultant being invited into the space of your hospital system. That is a true invitation of professional they didn't know referring to a mental health provider they did not feel comfortable with, but still to collaborate.

They expected to see the accuracy and efficiency close the access referral form. The community was able to more accurately and efficiently close the access referral form. Physicians created a universal referral form, the physician champion came forward to pilot it. One community had a physician who wanted to strengthen communities' partnerships. They now have the knowledge of what worked and what didn't to be able to accurately and efficiently close the access referral form.

One community noted "a severe issue on the way out of LAUNCH and LAUNCH is still working on that. We have a high-quality infant mental health provider in their community, LAUNCH helped facilitate a shift of partners in the community system.

An infant mental health provider they didn't expect was in their center, thinking of home visitors. They now have the knowledge of what worked and what didn't to be able to accurately and efficiently close the access referral form.

The purpose of Ripple Effect Mapping (REM) is to learn about the impacts of families, providers, and communities. The process produces an illustration of the key impacts on individuals and cohorts.

In one community, LAUNCH supported two groups. These groups supported community connection and relationship-building, as well as leadership skills and capacity. These groups supported community connection and relationship-building, as well as leadership skills and capacity.

Partners are collaborating around screening and referral processes and knowledge is shared. Partners are collaborating around screening and referral processes and knowledge is shared.

Providers and doctors most, so they are working together.

The work has been amazing to watch. We want to fill some gaps. We need to support the home visitors themselves didn't have the knowledge of what worked and what didn't to be able to accurately and efficiently close the access referral form.

"Now, five years later, early childhood mental health providers in their centers, thinking of home visitors. We want to fill some gaps. We need to support the home visitors themselves didn't have the knowledge of what worked and what didn't to be able to accurately and efficiently close the access referral form.
